Table 20.11: Common Options Used in `curl`

Long	Short	Arg	Notes
`--request`	`-X`	Yes	GET, POST, PUT, DELETE
`--url`		No	Specify URL for target of HTTP request; can also omit this option and specify as *last* on command line, after all options.
`--trace`		Yes	Give file that shows trace information flow.
`--verbose`	`-v`	No	Verbose output; can be used to see request headers
`--header`	`-H`	Yes	Specify string to be used as a header line
`--head`	`-I`	No	Send `HEAD` as HTTP method, to get just headers as return
`--get`	`-G`	No	Select `GET` as HTTP method
`--include`	`-I`	No	Show response headers as well as body as output
`--data`	`-d`	Yes	Argument can be `'key=value` for specifying one Form element for the POST body
`--silent`	`-s`	No	Hide progress meter
